

## **Motortech Brake Cleaner (MT200) – Technical Data Sheet**

**Motortech Brake Cleaner** is a dynamic cleaner designed to rapidly remove brake fluids, oils, dust, dirt, grease and other contaminants from brake linings, disc pads, drums, clutch plates, rotors, cylinders and springs. Stops squeal in disc brakes and can be applied without disassembly of brakes. **Motortech Brake Cleaner** dries super fast which enables quicker brake part changes. It also cleans other workshop equipment.

### **Directions for Use**

If possible lay rags or cardboard paper under the area where cleaning is to take place so as to contain residues resulting from the cleaning process and prevent them from entering drains and waterways.

Shake the can well for a few seconds and apply liberally onto areas to be cleaned and allow to run off. Allow to air dry or dry by wiping the residues with a cloth. Repeat if necessary for thick deposits of contaminants to ensure complete removal.

### **Caution**

**Do not** spray onto painted surfaces. If accidentally sprayed onto painted surfaces then remove immediately by washing with water. **Do not** allow this product to dry onto painted surface as it will lead to a streaky appearance. If this happens then polish the surface.

Avoid applying onto bitumen surfaces or rubber as it is likely to soften such surfaces and render them sticky for long periods.

### **Usage**

Under normal usage the **Motortech Brake Cleaner** will provide up to 300 spray applications per 400 gram can. Usage will also be dependent on the application technique, temperature and atmospheric conditions.

### **Workability**

**Motortech Brake Cleaner** contains active constituents that will rapidly soften and dissolve the strong bonding between the contaminants and the brake lining causing the contaminants to detach and run off. **Motortech Brake Cleaner** contains powerful reagents enabling penetration into narrow crevices and difficult to get to areas.

**Motortech Brake Cleaner** can also be used as a general purpose cleaner and is very effective at cleaning other workshop equipment including vices, tools, metal frames etc.

**Pack Size**

400 grams.

**Warning**

Intentional misuse by deliberately concentrating or inhaling contents can be harmful or fatal. Keep in a cool dry place away from sun. Do not store above 50°C. Do not use near fire or naked flame. Do not incinerate this can even when empty. Dispose of waste residues and empty cans thoughtfully.

**Health And Safety**

Keep out of reach of children. For first aid and emergency refer to Material Safety Data Sheet or contact the Poisons Information Centre on 131126.

**Propellant**

Hydrocarbon
