

Motortech Silicone Spray (MT184) - Technical Data Sheet

Motortech Silicone Spray is a heavy duty lubricant designed to lubricate, waterproof and protect most surfaces from binding, corroding and squeaking.

It is an ideal protectant for plastic, vinyl leather and rubber, window and sliding door tracks, doors hinges, rubber gaskets, metals, vinyl, fiberglass, locks, fishing equipment and boat fittings. It is suitable for marine, automotive and household applications.

Directions for Use

The surface must be free of dirt and dust. Degrease the surface to remove any traces of oil, wax and grease residues until a clean metal surface is achieved. Allow the surface to dry thoroughly.

Shake the can for about 1 minute to ensure uniformity of contents. Apply with short even strokes at 25-30cm from surface. For lubrication apply liberally onto the affected parts. To effect maximum penetration and corrosion protection, apply additional coats. Spray periodically as required.

Caution

Do not spray onto hard surface floors or where there is foot traffic as it will lubricate the floor leading to slippage causing personal injury.

Usage

Under normal usage the **Motortech Silicone Spray** will provide up to 310 spray applications per 330 gram can. Usage will also be dependant on the duration of the spray.

Workability

Motortech Silicone Spray contains heavy concentrations of low surface tension modifiers which not only impart lubricating properties to the surface but also corrosion resistance. When sprayed, the product will leave a thin transparent, non-staining and durable film that will prevent adherence and chemical bonding between metal surfaces thus eliminating squeaking.

Motortech Silicone Spray will lubricate surfaces up to 3 months on outdoor fixtures and greater than 2 years on indoor fixtures depending on the thickness of the applied film, temperature and exposure conditions.

Pack Size

330 grams.

Warning

Intentional misuse by deliberately concentrating or inhaling contents can be harmful or fatal. Keep in a cool dry place away from sun. Do not store above 50°C. Do not use near fire or naked flame. Do not incinerate this can even when empty. Dispose of empty cans thoughtfully.

Health And Safety

Keep out of reach of children. For first aid and emergency refer to Material Safety Data Sheet or contact the Poisons Information Centre on 131126.
