## APPLICATIONS

TOTAL QUARTZ 5000 FUTURE GF5 is a multi-grade oil, designed to meet lubrication requirements of recent cars.

This product is formulated as a mineral engine oil to provide a high oxidation stability.

This product has been designed to enhance the fuel economy aspect on vehicles. The formula meets the low volatility requirements of ILSAC GF-5 for improving engine cleanliness and reducing oil consumption.

## CLIENTS BENEFITS

- The product enhances **the engine performance**
- This product could be used for all high performance gasoline engine cars equipped with direct-injection, multi-valve, and turbo-charged technologies
- This product is designed to improve **the fuel economy efficiency**
- **Protection of three way catalyst poisons** by reducing the volatility of the phosphorus in the lubricant, a poison of the post-treatment devices

## RECOMMENDATIONS FOR USE

Before using the product, the vehicle's maintenance manual should be checked: oil changes should be carried out in accordance with the manufacturer's recommendations.

The product should not be stored at temperatures over 60°C. It should be kept away from sunlight, intense cold and extreme temperature fluctuations.

If possible, the packaging should not be exposed to the elements. Otherwise, the barrels should be laid horizontally in order to avoid any contamination from water and to prevent the product's label from rubbing off.

## HEALTH, SAFETY AND ENVIRONMENT

Based on the toxicological information available, this product should not cause any adverse health effects, provided it is used for its intended purpose and in accordance with the recommendations laid out in the Safety Data Sheet. This can be obtained on request from your local reseller and is available for consultation at [www.quickfds.fr](http://www.quickfds.fr).

This product should not be used for any purposes other than the ones for which it is intended.

When disposing of the product after use, please protect the environment and comply with local regulations.
