

## Tru Grit AC-20 Fuel Treatment

### Description

AC20 is an extremely effective detergent based fuel injector cleaner and fuel treatment suitable for diesel and petrol engines. It contains no hydrocarbons, is non corrosive and non-flammable. Its most primary function is to remove carbon build up from pistons and valves and lubricate the system using high performance imported additives providing for vastly improved burn profiles for fuel. Added ingredients promote moisture reduction in fuel and de-scaling of harmful organic and non-organic matter in fuel tanks and lines. AC20 incorporates an active biocide ingredient. Customer feedback on this product is consistently astounding.

### Benefits

Effectively mixes with and disperses water from fuel lines.  
Does not have harmful side effects on motors.  
Disperses water from diesel and eliminates the risk of microbial growth that is common in diesel fuel tanks.

Regular use of AC20 will ensure effective dispersion of fuel in the combustion chamber which eliminates:

\*Stalling \*Hesitation \*Decreased power \*Excessive emissions  
\*Poor performance \*Rough idling \*Uneven acceleration \*Loss of fuel economy

### Applications

AC20 can be used to treat fuel injection systems in vehicles with diesel or petrol engines.  
AC20 can be used in carburetor engines.

### Typical Physical Characteristics

**Appearance:** Pink Liquid

**Odour:** Slight Odour

**Flammable:** Non flammable

**Solubility:** Not soluble in water

**Flash Point:** 69°C

**Specific Gravity:** 0.91

### **Directions for Use**

- 1 For initial treatment, add 200ml of AC20 to a full tank of fuel (60L tank)
- 2 For subsequent fills, add 20ml of AC20 to fuel tank. (60L tank)

### **Typical Product Codes/ Quantities**

A/AC20/ (350)

350ml Plastic PVC Bottle (Box  
of 12)

A/AC20/20 20L Plastic HDPE  
Cube
