

Wire Rope Oil HDGF

Description

WIRE ROPE OIL HDGF is a heavy duty extreme pressure lubricant formulated for use on all types of wire ropes common to mining, construction and marine industries. It is developed and blended with a combination of mineral oils, penetrating oils and fortified with graphite and anti-wear and extreme pressure additives.

WIRE ROPE OIL HDGF is developed with a solvent base, designed to carry the lubricant into the core of the wire rope and then evaporate, leaving behind a heavy lubricating film to protect the wire rope.

Features & Benefits

WIRE ROPE OIL HDGF has two principal functions,

1. To reduce friction as the individual wires move over each other
2. To provide corrosion protection and lubrication in the core and inside wires and on the exterior surfaces.

SUMMARY OF BENEFITS

Resistance to water wash out
Protects against corrosion
Prolongs wire/cable life
Rapid displacement of moisture
Protects against wear
Adhesiveness to prevent throw off and sling
Rapid penetration to the inner core of wire rope
Excellent load carrying capabilities

Specifications

Specific Gravity	0.849
Viscosity @ 40C, cSt	15.0
Flash Point C (ASTM D-92)	75.0C

Health / Safety & Environment

Health, safety and environmental information is provided on the Material Safety Data Sheet for this product. Users should consult the MSDS, follow the precautions outlined and comply with all laws and regulations concerning its use and disposal.
